So that I understand:

1. Someone looks for NB site from the Regional or National EPA web site under Superfund
2. They will be directed to the NPL pad for NB where there is a sentence that says for more information click the link to bring the reader to the ne/nbh site.
3. Also on the NPL pad for NB, if one scrolls down, it currently has a section entitled Adm. Records, which now lists only up to 10 records. The proposal is that the section entitled Adm. Records would remain but the only thing that will appear is a link to the ne/nbh/technical documents site.
4. Clicking that link will bring the reader directly to the ne/nbh/technical documents and there will be a section entitled Adm. Records and as many records as we like can be found there.
5. In addition, if someone were to log directly into the ne/nbh site, at the bottom would be a section entitled Adm. Record, and the only thing that would appear under that section would be a line that says "For administrative records go to ne/nbh/technical documents."

Is this correct? If so, I'm ok with it.

Cindy,

I talked to our web staff here. The only way for us to add that line would be to bump another AR link to the "Other Links" header.

Now that we do have everything posted for short-term availability, I'd advocate looking at Ross's proposal of having the NPL Pad "Administrative Records" header just have one link that leads to a separate page or portion of a page on the New Bedford Harbor pages where you all can post as many ARs as you need.

Dave,

As we discussed on the phone, we are now moving the [Administrative Record Index, OU 02, Administrative Access Order, September 10, 1993 \(Opening file 335KB with links to other PDF files\)](#)  to "Other Links" and add the new AR under "Administrative Records".

My understanding is that the various stakeholders need to come to an agreement on re-arranging the New Bedford html pages to Ross's recommendations. That sounds like a good solution, but one that we can implement once everyone agrees. In the meantime, the current public comment ESD will be available on both websites.

Since we have reached the limit for NPL Pad and since New Bedford already has html pages, I recommend we move the links for all Administrative Records and decision documents from the NPL pad web page to <http://www.epa.gov/ne/nbh/techdocs.html>

Suggest reorganizing the last section with subsections to make it look like (we would fill in the gaps to make sure all the documents are listed).

On NPL Pad, we would merely have a link to the html page akin to what we do for the majority of the New Bedford content.

Does this work for everyone?

Unless we hear differently, we will move the [Administrative Record Index, OU 02, Administrative Access Order, September 10, 1993 \(Opening file 335KB with links to other PDF files\)](#)  to "Other Links" and add the new AR under "Administrative Records".

If we don't hear anything by COB Monday, please make the move.

Dave,

As one of the final steps on the New Bedford ESD AR project, we are placing the AR Index (with links to all the AR documents) on the NPL Pad website.

Unfortunately the structure of NPL Pad only allows for 10 postings under the "Administrative Records" heading and there are already 10 AR Indices posted in that area.

This will not affect the posting of the AR index with links to the separate New Bedford Harbor website.

I am therefore asking for direction from you and the rest of the case team on how to handle this posting.

Options include:

- forego posting the AR index on the NPL Pad page
- remove one of the older AR indices in order free a 'slot' for this new AR
- place this AR index under a different heading such as "Reports & Studies" or "Other Links"
- move one of the older AR indices to a different heading such as "Reports & Studies" or "Other Links" in order free a 'slot' for this new AR

This problem should not occur again with the final ESD AR since, we will replace this public comment AR index with the final AR index.

I look forward to your guidance on this issue.

Thank you
